

## APPLICATION

Suitable for permanent or semi-permanent use.

## NEEDS ASSESSMENT

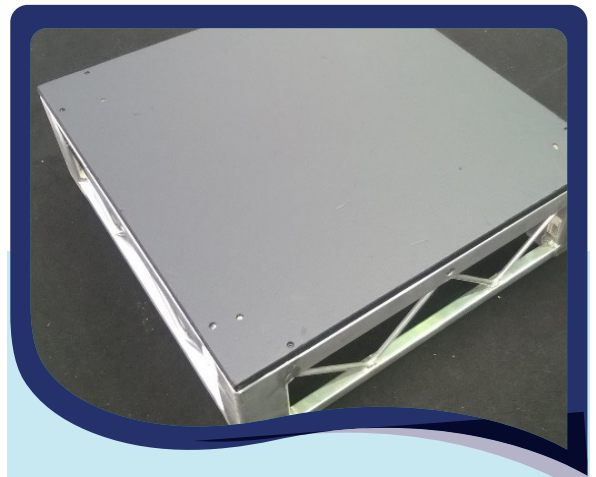

- **STAGE EXTENSIONS** - To extend an existing stage to a certain length or width, sometimes you require an odd sized stage module to complete the job. The 1/8th Deck is ideally suited to making non standardized stages.
- **STAGE INFILLS** - Often there will be certain sections in a venue or outdoor location where a gap needs to be filled. The smallest Megadeck in our range is just what you need when trying to fill in small areas.
- **PRODUCT STAND** - Used for small promotional items or as a stand for a photo shoot, the small 1/8th deck is perfectly suited. It can be raised to any height, making it a comfortable working platform for photographers and retailers.
- **MODEL STAND** - For individual models requiring a slight elevation for a shoot, the small 1/8th deck is just the right size for one person to stand on.

## TECHNICAL DIAGNOSTICS & SPECIFICATIONS

Routed timber top edges ensure a safe and smooth finish. Precut connection points on all four sides of the Megadeck allow for modular stage configurations. Secure stage legs with star bolts make for quick and easy installations. Stage legs with black end caps for protection of flooring.

## RATINGS AND WARRANTY

Every Megadeck stage is made in Australia and constructed from locally sourced materials. Our workmanship is backed by a 12 month warranty on new purchases and a life time's manufacturer's guarantee. Megadeck stage units are rated by Test Safe Australia as a seal of approval and for your peace of mind.

Simple to use, lightweight in construction and extremely versatile. Most commonly used for small items or stage extensions.

## FACTS

- Constructed from high grade **aluminium** for a light yet strong frame
- **Structural** 15mm timber top
- Measures-600mm wide x 600mm long x 188mm tall
- Weighs **4.5kg**, a weight well within safe lifting limits
- Suitable **working heights** range from 200mm - 2400mm
- **KPA** rating of 6.6 meaning each Megadeck can withstand 1800KG of disputed weight
- **Point Load** of 500kg for concentrated loads
- **Australian made**
