

APPLICATION

Suitable for permanent or semi-permanent use.
Can be used indoors or outdoors and to provide a secure boundary on stage and preventative support.

NEEDS ASSESSMENT

- **VIEWING PLATFORMS** - Often used to encase a raised stage at a considerable height to provide safe and secure barricades.
- **TIERED / ELEVATED RISERS** - Tall or tiered stages for the general public require enclosed handrails which the heavy-duty handrails are ideally suited for.
- **BRANDING** - The solid construction of the heavy-duty handrails allows for additional branding or structural supports including hanging banners and or truss frames.
- **STEPS** - To complete the stage set-up, our heavy-duty handrails are designed to fit Megadeck steps for continuity and seamless finish.

TECHNICAL DIAGNOSTICS & SPECIFICATIONS

Enclosed handrails are required for stages used by the general public such as elevated or tiered seating risers.

The heavy duty steel frame construction and enclosed timber inserts provide a safe and practical solution to working with staging at height.

The heavy duty handrails have custom designed couplings for easy installation and removal.

All heavy duty handrails are compatible with the full range of Megadeck stages.

Robust and fully enclosed handrails for large numbers of people and seating risers.

FACTS

- Constructed from high grade **Steel** providing a strong frame and an enclosed barrier
- **Secured** - With custom couplings and bolts
- **Measures** - 1200mm tall
Sizes range from 600mm wide through to 2400mm
- Suitable **working heights** range from 200mm - 2400mm
- **Australian** made
