

APPLICATION

Suitable for permanent or semi-permanent use.
Can be used indoors or outdoors to provide a secure boundary on stage and preventative support.

NEEDS ASSESSMENT

- **PERFORMANCE STAGES** - Having performers working at height and often in low light conditions, it is important to know that a safe and protective structure around the stage can be achieved with standard handrails.
- **GENERAL PUBLIC STAGING** - Although standard handrails are not mandatory for stages under 1000mm, it is often a wise decision to use handrails where the general public will be entering and exiting on stage. Some instances will only require a partial handrail to fill in a gap between a stage and a section of the venue / environment which is where our range of different sized handrails come into play.
- **STEPS & STAIRS** - With a wide range of steps and access stairs available, a matching assortment of step handrails can be supplied for assisted access on stage.

TECHNICAL DIAGNOSTICS & SPECIFICATIONS

Standard handrails are required for stages 1000mm and taller. Handrails are easily installed and attached with custom backing plates and bolts. All standard handrails are compatible with the full range of Megadeck stages.

Simple to use, lightweight in construction and extremely versatile.

FACTS

- Constructed from high grade **Steel** for a light yet strong frame
- **Secured** - With custom backing plates and bolts
- **Measures** - 1200mm tall
- **Sizes** range from 600mm wide to 4800mm wide
- Suitable **working heights** range from 200mm - 2400mm
- **Colour** - All standard handrails are black
- **Australian** made
